CHAUHAN HITEN | PHP DEVDELOPER

+91 9328255232 | hitenc239@gmail.com | linkedin.com/in/hiten chauhan/

PROFILE SUMMERY

- Experienced PHP Developer with 6 months of professional experience building dynamic websites and applications. Proficient in PHP, MySQL, HTML/CSS, and JavaScript.
- Proven ability to develop full-stack solutions, as demonstrated by projects like a feature-rich E-commerce site and a Mobile Shop management system.
- Eager to apply expertise in coding and optimizing applications.

SKILLS

- **Programming Languages:** PHP, HTML, CSS, JavaScript
- **Database:** MySQL

EDUCATION

10th | A.K.Moradiya High School   *2019*

12th | A.K.Moradiya High School   *2021*

BCA | Swami Sahajanand college of computer science, Bhavnagar   *2021 – 2024*

EXPERIENCE

Fortune Technologies PVT.LTD.   *2023 - 2024*

- Experienced Php developer with 6 month Of experience building dynamic website and apps expertise In coding and optimizing applications.

PROJECTS

E-commerce

- E-commerce Site project is developed using PHP,CSS and javascript. Talking about the project it has all the require essential features.
- This project has a user side where he/she can view product category and product to cart and proceed for check out whereas for administration side he/she can views sales, number of products, user, daily sales report and product and categories.
- The user can also leave comments on each product if he/she wants. In this project all the main functions are performed from the admin side.

Mobile Shop

- In mobile store/shop management system project we use PHP and MySQL database.
- This is the project which keeps records Of the inventory product,reviwever detail, order detail.
- The mobile store/shop management system has two modules l.e. user and admin.

SKILLS AND ACTION

Backend Development

Responsibility:

- A PHP backend developer is responsible for writing clean, maintainable, and efficient server-side code using PHP, while also designing, implementing, and managing databases, typically with MySQL.
- Performance optimization is a key aspect of their role, as they monitor and improve application performance, ensuring fast response times and efficient database queries.
- Security is paramount, so they implement measures to protect applications from vulnerabilities such as SQL injection and cross-site scripting.
- Additionally, PHP backend developers utilize version control systems like Git for code management, write unit tests, and debug issues to maintain code quality.

Frontend Development

Responsibility:

- A frontend developer is responsible for creating and maintaining the user interface and user experience of web applications, primarily using HTML, CSS, and JavaScript, while integrating these elements with PHP for dynamic content.
- Their role includes designing responsive and visually appealing layouts that function well across various devices and browsers, ensuring optimal performance and accessibility.
- Frontend developers also conduct testing and debugging to identify and resolve issues, while collaborating with designers and stakeholders to translate project requirements into functional features.

Databases

Responsibility:

- PHP developers are tasked with designing, implementing, and maintaining databases, typically using systems like MySQL or phpmyadmin, to store and retrieve application data effectively.
- They must create and optimize database schemas, write complex SQL queries, and ensure data integrity and security through proper indexing and normalization techniques.
